

# RECALL-TYPE CHARGING KIT FOR 2011-2017 APRILIA RSV4 & TUONO V4

## RMS900-103809

- Heavy-duty Kokusan brand recall-type OEM flywheel
- Triple-tested heavy-duty stator
- OEM-style voltage regulator

**299\$ US**

## RMS900-103810

- Heavy-duty Kokusan brand recall-type OEM flywheel
- Triple-tested heavy-duty stator
- Heavy-duty RMSTATOR's renowned Mosfet voltage regulator

**349\$ US**

## Fitments

- Aprilia RSV4 2011-2017
- Aprilia Tuono V4 1000 2011-2017
- Aprilia Tuono V4 1100 2016-2017

## OEM Part numbers

**Flywheel Rotor & Stator Assembly:**

2D000049 (Replaces 897479)

**Voltage Regulator:** B043488

## Features

### Built to OEM size

Fits precisely in your ride: install it and forget it.

### RMSTATOR renowned MOSFET voltage regulation design (RMS900-103810 only)

Significantly decreases internal operating temperature with highly efficient MOSFET transistor regulation circuit.

### Improved epoxy

Uses high temperature epoxy that is stronger than OEM, eliminating the possibility of magnet detachment.

### High grade steel capping

Prevents harsh additives in motor oil from degrading the epoxy attaching the magnets. Though extremely unlikely, if a magnet did ever come loose, it would remain in the sleeve preventing contact with the stator.

### Precise balancing

Eliminates crankshaft vibrations for longer engine longevity.

### Shop with confidence

One year warranty. All products are tested.
